SAW, Inc.

Proven Successful for Hundreds of Northeastern Ohio Companies

QUALITY

Production operations are managed by trained, experienced workshop supervisors who pay strict attention to the quality control and productivity standards required by the customer. We are committed to the achievement of those performance standards.

AUTOMATION

SAW Inc's production workshops are modern, efficient facilities with accessible loading docks and material handling equipment to ensure safe receipt of raw material and return shipment of finished goods. State-of-the-art production automation is used to deliver product consistency and assure the highest quality. Accurate documentation is maintained to help our customers with inventory control.

ENGINEERING

In-house engineering support is available to provide production assistance as needed. Work flow efficiency studies are also available to assure your complete satisfaction.

PRODUCTIVITY

Workgroups of skilled adult workers are assigned to production tasks according to job requirements and individual work capabilities. Workers are enthusiastic and eager to provide consistency, productivity and a quality product.

ENCLAVES

Production teams of skilled adult workers are also available for long-term assignments. They work on-site at your plant or business location, saving shipping costs while allowing for tighter inventory control. Training and ongoing support is provided by SAW, Inc. for these on-site work opportunities. Additional services include mobile custodial crews and grounds maintenance.

BENEFITS

SAW, Inc. has met the performance standards of more than 400 companies over the past year. Our workers have saved them time, money, production floor space, product storage and handling costs and the need for human resources management. Our talented production teams of skilled adult workers can benefit any business or industrial organization. For an economical and production-proven packaging/assembly alternative, contact SAW, Inc. today at 216.861.0250.
